## THADOMAL SHAHANI ENGINEERING COLLEGE

### LETTER OF RECOMMENDATION

It gives me great pleasure to talk about Shrey Jain's potential and recommend him for further studies at your esteemed University. In my capacity as Associate Professor at Thadomal Shahani Engineering College. I have known him for two years. I have taught him the theory and practicals for subjects of Digital Communication, Computer Communication Networks and supervised his final year project. Given the myriad of opportunities to gauge his potential, I am confident that he will gel with the student body and add value to your institution.

Shrey came across as a bright and quick-witted student with a strong desire to assimilate the knowledge shared in the class. During the lectures, he was an attentive listener and asked intuitive doubts to understand the concepts, which benefitted him as well as his batch mates. His understanding of the subject was strong, because of which he grasped complex concepts like the Computer Networks with utmost ease. He has shown a tremendous predilection towards in-depth learning and is never the one to be satiated with superficial knowledge. He has done a Google-authorized Computer Network certification course to supplement his knowledge. His timely submission of assignments and projects reaffirms his assiduousness towards his studies.

Under my aegis, Shrey completed his final year project titled 'Fake News Detector.' The aim of the project was to detect any text-based fake news from an article using machine learning models for which he efficiently applied the concepts of Python, Machine Learning, and Data Structures. I was impressed to see how he proficiently used the algorithms to predict the probability of the text, whether it was fake or not. He was responsible for modeling and implementing the classification model and BERT transformer, showcasing his laudable technical acumen. Owing to his impeccable presentation and analytical skills, he managed and presented the technical aspect of the project. Additionally, a quality that distinguishes him from his peers is his receptiveness towards feedback.

To conclude, I wish to assert that Shrey is a student who believes in performing to the best of his abilities and will work very hard towards the fulfillment of any responsibility that he undertakes. His zest for knowledge, diverse skillset and interpersonal skills will see him achieve the highest laurels in his chosen field. I am confident that he will prove to be an invaluable asset to your esteemed institution, hence, I strongly recommend him for admission to your University for graduate studies.

Sincerely,

Prof. Anuradha Rao

M.Tech, Associate Professor, Electronics & Telecommunication Department
